

FedStats 508/ Accessibility Workshop

June 24, 2002

Deque Systems understands that by their very nature, statistical, mathematical and scientific information presents a challenge to Web accessibility.

Deque is proud to introduce RAMP™ As THE Solution for Accessibility Needs

RAMP™ - Addresses the challenges and provides a strategy for implementing accessibility for statistical content.

Key Highlights:

Table Wizards for automatically making irregular, nested, and n-dimensional complex tables with multiple level of headings and special statistical formatting fully accessible without manual code changes.

Conversion of Statistical graphs and maps from different image formats to accessible client-side image maps automated by an interactive processes
